THE OCEAN-CLIMATE NEXUS AND COASTAL RESILIENCE: BUILDING A SUSTAINABLE FUTURE FOCUSING ON TARGETS 1, 2, 3, 8, 11 AND 19

10.55 -11:55 am
 at the CAF Pavillion

Language of the
 event: English

Ocean-based solutions have the potential to address climate change and biodiversity loss, delivering on both the Paris Agreement and Global Biodiversity Framework. While governments are revising their national strategies, this session will showcase the potential of these solutions for integrated climate and biodiversity action, focusing mainly on coastal resilience. It will also address levers, such as finance and stakeholder engagement, to implement them. Specifically, the session will dive deeper into the Marine Conservation Breakthrough and the Coastal Risk Index, highlighting the opportunities they provide to accelerate investments and action across agendas.
